Quick Installation Guide
150Mbps Wireless N Router

MODEL NO. TL-WR740N/TL-WR741ND

Package Contents
- TL-WR740N/TL-WR741ND
- Power Adapter
- Ethernet Cable
- Resource CD
- QIG

System Requirement
- Windows 7
- Windows Vista
- Windows XP
- Windows 2000

1 Hardware Connection

Step 1. Connect the WAN port on your Router to the Modem’s LAN port with an Ethernet cable.
Step 2. Connect your computer to any port labeled 1-4 on the Router with an Ethernet cable.
Step 3. Plug one end of the provided Power Adapter into the POWER jack on the back of the Router and the other end to a standard electrical wall socket. Press the ON/OFF button to power on the Router.

2 Connecting by Easy Setup Assistant

The Easy Setup Assistant is not supported in Linux or Mac OS. If you are running Linux/Mac or without CD-ROM, please refer to Appendix 1.

1. Insert the TP-LINK Resource CD into the CD-ROM drive.
2. Here we take TL-WR740N for example. Select TL-WR740N and click Easy Setup Assistant.
3. After confirming the hardware connection and the status of LEDs, click NEXT to continue.
4. After the connectivity has been checked successfully, please click NEXT to continue.
5. Select the connection type your ISP provides and click NEXT. Here we take connection type PPPoE for example.
6. Enter the User Name and Password provided by your ISP and then click NEXT.
7. Create a unique or easy-to-remember name for your wireless network. You can also keep the default setting. Click NEXT to continue.
8. You are recommended to select Most Security (WPA2-PSK) to secure your wireless network. Enter a key of 8–63 characters and click NEXT.

(TB be continued)
2 Connecting by Easy Setup Assistant (continued)

9 After confirming the configuration, click NEXT to continue.

10 After the configuration is completed successfully, please click NEXT.

11 Click FINISH to close the wizard.

12 The basic settings for your Router are completed. You can go to https://www.tp-link.com to verify the Internet connection.

You can click WEB management interface for more advanced settings.

Appendix 1: Connecting by WEB Management Interface

You can go to WEB management interfaces to configure your Router.

1) Set the IP address of your wired network adapter as Automatically.

For Windows 7

Go to ‘Start > Control Panel > View network status and tasks > Local Area Connection > Properties’ and double-click Internet Protocol Version 4 (TCP/IPv4). Select ‘Obtain an IP address automatically’; choose ‘Obtain DNS server address automatically’ and click OK.

For Windows Vista

Go to ‘Start > Settings > Control Panel > View network status and tasks > View status > Properties’ and double-click Internet Protocol Version 4 (TCP/IPv4). Select ‘Obtain an IP address automatically’; choose ‘Obtain DNS server address automatically’ and click OK.

For Windows XP/2000

Go to ‘Start > Control Panel > Click ‘Network and Internet Connections’ > Network Connections’. Right-click Local Area Connection, select Properties’ and then double-click Internet Protocol (TCP/IP). Select ‘Obtain an IP address automatically’; choose ‘Obtain DNS server address automatically’ and click OK.

2) Open your browser and type tplinklogin.net in the address field. Then use admin for user name and password to login.

3) Go to Quick Setup and click Next. Select your internet connection type and click Next.

4) Here we take PPPoE for example. Enter the User Name and Password provided by your ISP and then click Next.

5) Configure your network name (SSID) and password, then click Next to continue.

6) Click Finish or Reset to make your settings take effect.

Appendix 2: Troubleshooting

How do I restore my Router’s configuration to its factory default settings?

With the Router powered on, use a pin to press and hold the RESET button on the rear panel for about 8 seconds before releasing it.

What can I do if I cannot access the Internet?

1) Check to see if all the connectors are connected well, including the telephone line (for your modem), Ethernet cable and power adapter.

2) Check to see if you can access the Router’s web management page. If you can, please take the following steps to solve the problem. If you can’t, please refer to Appendix 1.

3) Make sure that you are connected to the TP-LINK Router with the computer that was originally connected to your modem, then log on to the web-based management page and browse to ‘Network’ > MAC Clone, click ‘Clone MAC address’ and then click ‘Save’. Reboot the Router and try to access the Internet from your computer. If the problem persists, please go to the next step.

What can I do if I forgot my password?

1) Restore the Router’s configuration to its factory default settings. If you don’t know how to do that, please refer to How do I restore my Router’s configuration to its factory default settings?

2) Use the default user name and password: admin, admin.

3) Try to configure your router once again by following the instructions in the previous steps of the QIG.

You can refer to our User Guide on the CD to set up more functions of the Router.
